

# Is measuring carbon good for business?

## Video presentations

**If you are curious about everything carbon, hear from producers about their experience with carbon projects, learn about emissions and global markets and discover innovative farming practices in these informative [videos](#)!** A great team of industry experts cover many topics and emerging areas of interest. Hear from soil scientists, Department of Primary Industries and Regional Development advisors, GrainGrowers, University of Sydney, Rabobank, award-winning beef producers, LLS officers and Nuffield scholars. **You can view it all [here](#).**

## **Help with measuring and managing your emissions**

If you are keen to explore more about measuring emissions, Local Land Services (LLS) and Department of Primary Industries and Regional Development (DPIRD) are delivering small group and one-on-one sessions. These sessions will cover understanding and identifying sources of on-farm emissions, calculating and tracking emissions and using emission calculators. The sessions are designed for beef, sheep, dairy and mixed farming businesses. Contact Lana Andrews (NW LLS Sustainable Agriculture Facilitator) on 0417328 615 or [lane.andrews@lls.nsw.gov.au](mailto:lane.andrews@lls.nsw.gov.au) for more information.
